U.S. EXPORT SALES

- Outstanding Export Sales
(Unshipped Balances)
On August 10, 1975
- Export shipments in
Current Marketing Year
- Daily Sales reported
August 11 - 19, 1975

-- As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

U.S. DEPARTMENT OF AGRICULTURE, FOREIGN AGRICULTURAL SERVICE

EXPORT SALES REPORT

Comments on release of August 21, 1975 (based on reports from exporters during the week ending August 10, unless otherwise noted):

SOVIET GRAIN IMPORTS: The Soviet Union, as of August 19, reportedly has purchased about 15.2 million metric tons (MT) of grain for 1975/76 delivery, including about 600,000 MT of wheat for delivery to Cuba. Of the grain destined for the USSR, about 8.75 million MT will be wheat, with at least 3.75 million MT coming from Canada, 1.0 million MT from Australia, 0.2 million MT reportedly from Argentina, and most of the balance likely to come from the United States. Of the total 5.85 million MT of feed-grain purchases, most is likely to come from the United States although at least some of the sales provide for the option of shipment from origins other than the United States.

Earlier reports of delivery schedules of grain had indicated that about 3.0 million MT of the 14.6 million MT destined for the USSR might be deferred until the 1976/77 (July/June) crop year. Latest indications are, however, that virtually all of the grain purchased so far (with the possible exception of a small quantity of Canadian wheat) will be shipped during the current July/June season.

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for 1975/76 increased by 887,700 MT. Commitments to the European Community (EC) rose by 313,000 MT to 1.5 million MT. Hot, dry weather through much of West Europe has caused reduced yields, but import requirements will probably not differ significantly from those in 1974/75 because of the unusually large volume of carryover stocks. Commitments to Japan increased by 156,400 MT to 1.3 million MT, while other major increases in commitments were made to Poland and Nigeria of 116,800 MT and 105,300 MT, respectively.

Sales reported under the daily reporting system during the period August 11-19 indicates purchases of 558,800 MT by East Germany for January-March 1976 delivery, and 101,560 MT to Poland for September 1975-January 1976 delivery.

Feedgrains: Total corn commitments for 1974/75 increased by 187,500 MT, and was largely accounted for by higher commitments to Spain and the EC of 119,000 MT and 62,500 MT, respectively. At this time last year, commitments for 1974/75 shipment totaled 15.4 million MT--more than double the commitments made so far for 1975/76 shipment. Total sorghum commitments increased by 231,000 MT, largely on the basis of higher commitments to Japan and Poland of 169,800 MT and 45,700 MT, respectively.

Sales reported under the daily reporting system during the period August 11-19 indicate purchases of 233,200 MT by East Germany for November 1975-February 1976 delivery.

Soybeans: The apparent export commitment for 1974/75 decreased by 88,700 MT, primarily reflecting cancellations to Spain and the Netherlands of 61,000 MT and 43,800 MT, respectively. Exports during the week totaled 256,300 MT, primarily to Japan (111,400 MT) and EC destinations (117,700 MT). As the season nears an end, accumulated exports as reported by exporters now total 11.4 million MT, 272,000 MT above the USDA 1974/75 export estimate which is based on official Census data. Weekly cumulative export data are reported directly to USDA by exporters, whereas Census reports are only available monthly after a considerable lag. This year world demand for high protein meals has continued to lag. Relatively high feed prices which reduced livestock and poultry producer profits were instrumental in causing cutbacks in animal numbers in many major markets. World demand for food fats and oils also fell short of projected historical trends because of declining real incomes and some downward adjustments in hidden inventories.

Soybean Meal: The apparent export commitment for 1974/75 declined by 66,800 MT. The Netherlands and West Germany decreased by 45,600 MT and 26,200 MT, respectively, while increases of 5,000 MT were registered for both Italy and Czechoslovakia. Exports of 56,100 MT were primarily to the EC (22,100 MT), Spain (10,400 MT), and unknown destinations (9,800 MT).

Soybean Oil: The apparent export commitment for 1974/75 decreased by 12,800 MT, primarily to the Netherlands (9,000 MT), and unknown destinations (4,000 MT). Exports were 1,100 MT.

Cotton: Outstanding sales declined on good export shipments and inactive demand. Shipments against overdue Korean contracts accelerated exports to that destination almost 3 times higher than the average of the previous 5 weeks.

DAILY REPORTING - AN "EARLY-WARNING" SYSTEM

The daily reporting of large export sales of certain agricultural commodities is authorized under Section 812 of the Agricultural Act of 1970 which was added by the Agriculture and Consumer Protection Act of 1973. Under this broad authority, the Secretary of Agriculture may request exporters to report at any time any information on export sales of U.S. agricultural commodities. Daily reporting is an adjunct to weekly export sales reporting which is authorized under the same legislation.

Initiated in September of 1974, procedures governing the system have been modified to reflect changes in both the supply and export situations. Current procedures are contained in Notice to Exporters No. 1, Revision 2 dated March 6, 1975. Under this Notice, export sales of wheat, corn, grain sorghum, barley, oats, soybeans and soybean meal in quantities of 100,000 metric tons or more in any one day or totalling 200,000 metric tons or more in any one week (Monday through Sunday) to a single destination (known or unknown) must be reported by exporters by telephone no later than 3:00 p.m. (Eastern Time) on the next business day following the date of the transaction. Information to be reported includes quantity, destination, delivery period and marketing year, contract number, date of export sale and whether or not the sale is optional origin. This information is to be reported to the Export Sales Division, (202) 447-3273. Modifications (such as changes in quantity, destination, marketing year, etc.) in export sales previously reported under the daily system are also to be reported.

Export sales reported under the daily reporting system must also be reported under the weekly system and a cross-system checking is carried out to determine that such sales are properly reported under both systems. Under the daily system, exporters need not report sales made under Title I, PL 480 sales agreements, even though these sales are required to be included in weekly reports.

Information received from individual exporters through the daily system is kept confidential, although summary information is published in the weekly "U.S. Export Sales" publication. A sealed written report summarizing each day's activities is hand-carried to designated Departmental officials for their evaluation.

In view of the large U.S.S.R. grain import requirements on July 24, 1975, the Department asked private U.S. exporters to advise the Department before beginning negotiations of large export sales of grain. Following release of the August 11, 1975 crop estimates the Secretary announced that the Soviet Union and U.S. exporters had been requested to refrain from contracting for additional quantities of U.S. grain for 1975-76 shipment until more precise information is available concerning the size of the 1975 U.S. grain crops. While neither soybeans nor soybean meal have been sold to the U.S.S.R. through August 19, the request to refrain temporarily from further contracting also applies to these two commodities.

Activity under daily reporting had slowed considerably since early March when the minimum reporting quantity was raised to 100,000 metric tons for all of the commodities involved. Recent market activity, particularly in sales of grains to U.S.S.R. and Eastern Europe, have again brought the system into prominence. Since March 6, 1975, export sales totalling 11.8 million metric tons have been reported under the daily reporting system. U.S.S.R. was the major recipient of wheat and corn. Other countries were reported as destinations for lesser quantities of wheat and corn as well as for other commodities. The following table shows the quantities and destinations for export sales reported through the daily system between March 6 and August 19, 1975.

DAILY REPORTING - MARCH 6, - AUGUST 19, 1975
METRIC TONS
